Subject Index

algorithms, parallel 801
alignment 55
amphibian 549
associations, context-dependent 195
attractors 785
automata 247

binomial distribution 125
Birch Leaf roller 433
Brizalina 657
blood cell 449
brain 801

cancer 801
canonical variate analysis 657
cell cycle 639
chaos 537
Circadian timekeeping 537
clearance curves 579
clocks 537
clustering 133
codon preference 95
competition 687
cones 749
context-dependent associations 195
control 639

development 549
dialectical biologist 639
Dictyostelium discoideum 475
diffusion 325
distance data 597
distributed memories 195
dynamical systems 639

Ebenman's model 687
ecology 801
embryos 549
environment, fluctuating 311
enzyme kinetics 749
Eukaryotes 639
evolution 287, 537, 639

Foraminifera 657
fractal 785

genetics 537
genome shuffling 117
Gierer-Meinhardt model 207
glucose consumption 275

heterogeneous DNA 79
HIV 467, 715

identification, optimal 39
idiotypic networks 217
immunochemical sensing 359
immunology 247
individuality 287
information 347
isobole 293

landmarks 657
leaves 433
light reflex 605

matching 5
maximum principle 325
membrane 449
memories 223
  distributed 195
metabolic 255
Michaelis-Menten kinetics 325
microevolution 657
mixtures of agents 293
molecular processes 639
motor control 287
multiple codes 417

networks 247
  idiotypic 217, 381
neural modeling 801
neurons 337
nonequilibrium processes 287
nucleotide sequences 417

order distributions 511
optimal
  algorithm 597
  identification 39
oscillations, autonomous 605

parallel algorithms 801

pattern recognition 681
perception 681
phototransduction 749
plant communities 409
population size 625
probabilistic models 117
protein-coding regions 95
pupil 605

reaction times 347
resilience 501
resource-consumer system 501
rhythms 537
risk parameters 467
RNA folding 167

sensing, immunochemical 259
sequences
  molecular 1
  nucleotide 417
sequence structure, primary 95
similarity measures 133
smoothing 173
stability 501
statistical thermodynamics 287
stochastic
  methods 639
  models 79, 731
strategies, plant 409
subpopulation emergence 731
suppression 223
survival 311
system identification 337

tank-treading 449
tetrangle inequality 173
trees
  binary topological 511
  reconstruction of 597
Tribolium 625
tumors, heterogeneous 731

underdetermination 247

ventricular performance 475

wavelength selection 207
weak hierarchies 133
